## WHO BENEFITS FROM PRIVATE LABELING?

Bars, Coffee Houses, Baristas, Hotels, Restaurants, Cafés, Bed and Breakfasts, and any entrepreneur who offers or want to offer bulk roasted coffee within their business establishment.

## BENEFITS OF PRIVATE LABEL COFFEES

Wholesale buying-no manufacturing; we take care of it.

You can alter it in any way - you own the legal rights.

You're buying quality products already tested on the market, encouraging your success.

You provide a superb coffee with your branding to advertise your business.

## CHOOSE THE TASTE YOU DESIRE THE MOST.

Arabica has a mild, aromatic taste, whereas Robusta has a full-bodied earthy flavour, higher in antioxidants and caffeine. Do you prefer single origin or a blend?

## CHOOSE YOUR ROAST

Roasting is the briefest yet most important and painstaking stage in coffee production. This process carries a heavy weight of responsibility. The heat applied to the green coffee beans during roasting changes their colour from the original light green to brown. The roasting process uncovers over 900 aromas hidden in the beans.

## PERSONALIZED DESIGN.

We can offer any conventional packaging formats required in the marketplace across all sectors: retail, wholesale, vending and HORECA. Our packaging provides complete protection against external factors.

## BECOME A SUCCESS STORY.

You are ready to sell your story with your private label coffee! We guarantee you personalisation & customisation, a multi-level approach, and above all: great taste and quality for your coffee brand.
